PROFILE

I am a medical professional with sound knowledge of the basic sciences and clinical practice. I am a graduate of the College of Medicine, University of Lagos (CMUL/LUTH) and I am armed with skills in public speaking, presentation, information research and project management. I am well versed in the use of PowerPoint and other presentation tools. An effective communicator and listener. Works well both as an individual and in teams. I have participated in various health awareness programs varying from infectious diseases like Lassa fever and HIV/AIDS to non-communicable diseases like cardiovascular diseases and obesity and less known gynecological diseases like endometriosis and I have participated in various free health checks to the general public. I am highly interested in Surgery, Preventive Health and the use of Nutrition as a way of optimizing health.

CAREER OBJECTIVES

- *To gain working experience,
- *Enhance my skills in communicating with patients, making diagnosis, treatment plans and follow-up,
- *To provide a better hospital experience for both patient and health care practitioners alike,
- *To further my medical training to consultancy level.

KEY SKILLS

- *Commitment towards patient care and patient health education,
- *Eagerness to updating knowledge on both well practiced methods and new innovations in the field of Medicine and Surgery.
- *Skills at Counseling and Patient Centered Care which allows for effective communication of patient's fear and concerns in a friendly and confidential environment.
- *Dietary Counseling.
- *Proficiency in the use of Microsoft Office Tools and Internet based research tools.
